WORK EXPERIENCE

Veeva Systems

Toronto, ON

Associate Software Engineer

Sept 2025 - Present

- Refactoring a **Spring Boot microservice** toward single responsibility, moving business logic out so it purely handles AS2 transmissions
- Consolidated ownership of a cross-team data mapping, scoping most changes to a single team
- Redesigned how connections are configured, migrating from a single shared profile to per-connection profiles via a custom copy action and data migration

CleanBill

Vancouver, BC

Software Developer (Contract, Part-Time)

April 2025 - Aug 2025

- Built an event-driven pipeline (**Inngest**, **AWS Textract**) to automate billing data extraction from ER visit summaries, **eliminating a manual triage step that scaled with intake volume (~1 hr/day)**
- Designed a **linear-time shift-bucketing algorithm** to infer each document's billing shift from overlapping time windows
- Extended the parser to extract clinical notes based on OCR text-block geometry

TAIT

Vancouver, BC (Remote)

Software Developer Intern

May 2024 - Aug 2024

- Collaborated on [Feltboard](#), a Digital CMS for the Experience Design industry
- Optimized storage efficiency by implementing shared media buckets, **reducing redundant uploads by up to 5X**
- Enhanced user workflow by creating a “save as” feature, allowing users to easily replicate and modify data structures

TAIT

Vancouver, BC (Remote)

Software Developer Intern

July 2022 - Aug 2023

- Developed a frontend dashboard using **Vue** to allow users to monitor key metrics within their connected devices
- Facilitated dynamic schema relationships, empowering users to effortlessly create and manage intricate content structures by referencing one schema from another

University of British Columbia

Vancouver, BC

Teaching Assistant

Sept 2021 - Dec 2022

- Taught fundamental programming skills and concepts such as recursion, graph traversal, testing, and debugging
- Led weekly labs and office hours for over 1200 students over three academic semesters

PROJECTS

Sports Macros | sports-macros.benvinnick.com

Oct 2021 - Present

- Facilitates effortless generation of macros, optimizing the media captioning workflow within Photo Mechanic
- Utilized by professional NHL photographers during **every Vancouver Canucks home game for the past 5 seasons**

Loltest | github.com/bonvee-99/loltest

June 2026 - Present

- Built a **Go microservice** game backend with concurrency-safe matchmaking and a load-test harness simulating thousands of concurrent players

EDUCATION

University of British Columbia

Vancouver, BC

Bachelor of Science, Computer Science

Sept 2019 - April 2025

TECHNICAL SKILLS

Languages: Java, Go, TypeScript, JavaScript, Bash, SQL, NoSQL, GraphQL, HTML, CSS
